... A DIFFERENT KIND OF COMPANY

... A DIFFERENT KIND OF DOORS

Timeless and unique by Foret

Architectural solid wood doors and wrought iron work with Old World charm.

Experience the beauty of a high quality custom handcrafted solid wood door.

We will craft your new entry system, only limited by your imagination.

All of our products are created the old fashioned way, by hand and one at a time, making each door a unique piece.

You can create the facade of your dreams with our architectural solid wood doors, sidelites, transoms, iron work, any size and any style.

No matter if you choose a French , Tuscan, Mediterranean, Ranch, Craftsman, Rustic Wrought Iron, Southwest style, you will always get the traditional look and feel that only real hardwoods can offer.

Our doors are built with stile and rail, mortise and tenon construction and true divided lites.

Stiles, rails and panels are laminated with two layers of solid wood for 1-3/4" thick doors and three layers for 2-1/4" thick doors (no veneers or wood core).

This technology virtually eliminates cracking panels and warped stiles by allowing independent movement of wood surfaces exposed to different humidity and temperature conditions on each side of the door.

Panels are removable to allow a perfect finish.

Wrought iron inserts are hinged to facilitate glass cleaning.

Our priority is producing quality products in construction and design.

And our goal is to bring the beauty and individual character of handmade products into everyday living.

We ship anywhere in USA and Canada
